

SIMATS ENGINEERING

ASSESSMENT TOOL 1

COURSE NAME: OBJECT ORIENTED ANALYSIS AND DESIGN
COURSE CODE: CSA1110

COURSE OUTCOME COVERED

***CO1:** Apply object-oriented concepts and software development life cycle models to design structured and modular software systems. (BL2, BL3)*

Assessment Tool Weightage: 60%

Dr Manimaaran

QUESTIONS: 12

Total Marks:60

Annexure A

CONCEPT MAPPING

Code of Conduct:

*I **Tejaswini.M (192411079)** (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.*

I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student:

TEJASWINI.M

Annexure A

CONCEPT MAPPING

1. Construct a Concept Map

Given:

Requirement Analysis → _____ → Coding → Testing → _____ → Maintenance

Explanation:

Analysis:

- This sequence represents the Software Development Life Cycle (SDLC).
- Following this order ensures systematic development and reduces project risks.
- It helps in improving software quality, reliability and maintainability.

2. Construct a Concept Map

Given:

Object-Oriented Principles

Abstraction → _____ → Inheritance → _____

3. Construct a Concept Map

Given:

Class → Blueprint Object → Instance Method → _____ Attribute → _____

4. A Concept Map Shows

Given:

Software Quality → Reliability → _____ → Maintainability

5. UML Concept Map

Given:

UML → Structural Diagrams → _____ → Behavioral Diagrams → Activity Diagram → Interaction Diagrams → _____

6. Given:

Requirements ✓ → Design ✓ → Coding ✗ → Testing ✗ → Deployment ✗

7. Construct a Concept Map

Given:

Problem Identification → _____ → Design → Implementation → _____

8. Construct a Concept Map

Given:

Object-Oriented Features → Class → _____ → Message Passing → _____

9. Construct a Concept Map

Given: Software Development Models → Waterfall → _____ → Spiral → _____

10. Construct a Concept Map

Given: Class Diagram → Class → _____ → Association → _____

11. Construct a Concept Map

Given: Software Engineering Principles → Modularity → _____ → Reusability → _____

12. Given: Requirement Analysis ✓ → System Design ✓ → Coding ✓ → Integration
 ✗ → Deployment ✗

RUBRICS FOR CALCULATION

CONCEPT MAPPING

Criteria	Weightage	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)
Concept Identification	25%	Identifies all key concepts from literature accurately and comprehensively	Identifies most key concepts with minor omissions	Identifies limited concepts; some are irrelevant or missing	Fails to identify essential concepts
Linkages	25%	Establishes clear, meaningful, and accurate relationships between concepts	Shows correct relationships with minor gaps	Relationships are weak, unclear, or partially incorrect	No meaningful relationships established
Organization	20%	Concepts are well-structured hierarchically with logical flow and grouping	Mostly organized with minor structural issues	Some organization but lacks clear hierarchy	No logical organization or structure
Integration of Literature	20%	Integrates multiple studies effectively to show connections and comparisons	Shows some integration of literature	Limited integration; mostly isolated concepts	No integration of literature evidence
Clarity	10%	Concept map is clear, neat, visually structured, and easy to interpret	Generally clear with minor readability issues	Clarity is reduced; difficult to interpret in parts	Poorly presented and hard to understand
